

CHAPTER I

INTRODUCTION

1.1. Reason for Choosing the Title

Today the development of paper industry in our country is increasing sharply. Many customers buy this product. This condition is favorable to our country. Besides, this condition make a new field of works too. Because of the conditional of global market is difficult, it needs good human resources and a good production in order to compete in national and international market.

Paper company is the one with the product of paper. In PT. Sinar Indah Kertas Pati the component parts of the product are : mixed merge, box paper, core, old newspaper and paper pulp and the helping component are tapioka, waterglass and biocide. This company only produces one production, that is : medium linear. Medium linear was used as a wrapper of food, layer of cardboard and usually as a layer of furniture.

Many paper companies are established to fulfill customers need. Because of that, the competition becomes more difficult between them. A lot of companies try to find the best way to solve the problem. A good production is a good solution too. Because customers buy the best quality of product.

Generally many paper companies believe that their products are the best, although not all companies have a good product. The way to make a

good product is by using a good strategy in production process. Every company has its own strategy in production process. And the company that has a good strategy in production process will win the competition.

PT. Sinar Indah Kertas uses the continuous system like : preparing a raw material, separated a raw material putting the paper pulp on the wire, drying and the last is rolling the paper. They work with modernization, Based on the above explanation the writer interested to discuss " Production Process of papers at PT. Sinar Indah Kertas Pati "
