2.4 Permasalahan Data Mining ................................................................. 10
2.5 Teknik Data Mining ........................................................................ 11
2.6 Proses Data Mining ......................................................................... 12
2.7 Algoritma Apriori ................................................................. 13
2.8 Parameter Correlation .................................................................. 14
2.9 Metode Pengembangan Sistem Waterfall .................................. 15
2.10 Data Flow Diagram ................................................................. 16
2.11 Entity Relationship Diagram .................................................. 17
2.12 Java .......................................................................................... 18
2.13 Netbeans .................................................................................. 18
2.14 SPMF (Sequence Pattern Mining Framework) ...................... 18
2.15 MySQL ..................................................................................... 19
2.16 Metode Penentuan Sampel Slovin .......................................... 19

BAB 3 METODE PENELITIAN ............................................................. 20

3.1 Metode Pengumpulan Data ...................................................... 20
3.2 Sumber Data ................................................................................ 21
3.3 Metode Analisis ......................................................................... 21
3.4 Metode Pengembangan Sistem ............................................... 23

BAB 4 HASIL DAN PEMBAHASAN .................................................. 25

4.1 Objek Penelitian ......................................................................... 25
4.1.1 Sejarah UPT (Unit Pelaksana Teknis) Perpustakaan Udinus...... 25
4.1.2 Visi dan Misi UPT Perpustakaan UDINUS .............................. 25
4.1.3 Struktur Organisasi Perpustakaan Universitas Dian Nuswantoro.... 26
4.2 Tahapan Data Mining Algoritma Apriori dan Association Rule........ 27
4.2.1 Pemahaman Tujuan ............................................................. 27
4.2.2 Pemahaman Data ................................................................. 28
4.2.3 Pengolahan Data (Pre Processing) ........................................ 29
4.3 Perancangan Sistem.............................................................. 31
4.3.1 Analisa Kebutuhan Sistem.................................................. 31
4.3.2 Flowchart Mining Algoritma Apriori ................................. 32
4.3.3 Alur Sistem ....................................................................... 34
4.3.4 Perancangan Database ...................................................... 37
4.3.5 Perancangan Antarmuka .................................................... 38
4.4 Implementasi Sistem ............................................................. 40
4.5 Pengujian Sistem Black Box .................................................. 47
4.6 Tahapan Algoritma Apriori Association Rule dalam Program .... 64
  4.6.1 Proses Perhitungan Algoritma Apriori Association Rule
  Rekomendasi Peminjaman Buku .............................................. 64
  4.6.2 Proses Perhitungan Algoritma Apriori Association Rule Penempatan
  Buku ..................................................................................... 73
BAB 5 PENUTUP ........................................................................ 80
  5.1 Simpulan............................................................................... 80
  5.2 Saran..................................................................................... 81
Daftar Pustaka ........................................................................... 82
Lampiran ..................................................................................... 84
