ABSTRAK

Seiring berjalannya waktu penggunaan teknologi, khususnya teknologi perkomputeran sudah merambah ke berbagai arah, salah satunya adalah di bidang pendidikan dan kegiatan belajar mengajar. Namun sebagian besar implementasi teknologi tersebut hanya berpaku pada kegiatan belajar mengajarnya saja, sedangkan hal-hal yang dilakukan dibalik kegiatan tersebut sepenuhnya diserahkan kepada tenaga pengajar, memberikan beban tambahan kepada mereka. Dengan inisiatif inilah, penulis memilih untuk melakukan penelitian dan perancangan alat pembantu kepada topik ini. Salah satu yang dipilih adalah pengelolaan Bantuan Operasional Sekolah, program pembantu pembangunan sekolah dan kegiatan belajar mengajar yang diadakan oleh pemerintah selama beberapa tahun ini. Alasan utamanya dikarenakan topik tersebut masih belum terlalu diperhatikan, padahal berhasilnya program ini dapat berdampak besar bagi kesejahteraan sekolah, guru, dan siswa serta memperlancar proses belajar mengajar.

ABSTRACT

Over time the use of technology, especially computing has penetrated into various directions, one of which is in the field of education, teaching, and learning. However, most implementations of these technologies have only spiked on teaching and learning activities only, while things are done behind these activities is left entirely to the faculty, give additional burden to them. With this initiative, the authors chose to do the research and design of aid to this topic. One chosen is the management of the School Operational Assistance programs to help school development, teaching and learning activities organized by the government for several years. The main reason is because the topic doesn't get too much attention, but the success of this program can have a major impact on the welfare of the school, teachers, and students as well as facilitate the learning process.
