1. The translator should use the languages, which are familiar and easy to be understood by the readers.

2. The translator should adopt the language of the translation based on the category of the reader and kind of the text.

3. The safest way in translating idioms, if they do not work in the target language, is not to force them into the translation. Idiom more than any other features of language demands that the translator is not only accurate but also highly sensitive to the rhetorical nuances of the language.
