

CHAPTER V

CONCLUSION AND SUGGESTION

5.1. Conclusion

From the analysis, it can be concluded that:

From the utterances of Louanne Johnson in Dangerous Mind Movie, there are four categories of politeness strategies that have been found; they are bald on record, positive politeness, negative politeness, and off record. In bald on record strategy the researcher found 12 utterances, meanwhile politeness strategy is the most used by Ms. Johnson that is 30 utterances. And 9 for Negative Politeness strategy and 6 for off record strategy. The domination of positive politeness strategy is caused by age and social status of Ms. Johnson which is higher than her students, meanwhile formality also influence the domination of politeness strategy used by Ms. Johnson to the other (friends, staff of school, and students' parents). Another reason are Ms. Johnson gradually becomes closer to her students psychologically, and she also wants to maintain a good relationship to her students.

5.2. Suggestion

In everyday interaction when people communicate with others, people have to realize politeness. Positive politeness is very useful to promote or maintain a social relationship between the speaker and the hearer. People use positive politeness to lead the speaker to inquire for a common goal, and even friendship. The use of positive politeness is to emphasize the closeness between the speaker and the hearer. Thus, the usage of positive politeness is not only to redress the FTA but also to indicate that speaker wants to come closer to hearer.
