MOTTO

Whoever fears Allah - He will make for him a way out and will provide for him from where he does not expect. And whoever relies upon Allah - then He is sufficient for him. Indeed, Allah will accomplish His purpose. Allah has already set for everything a [decreed] extent. (At-Talaq; verses 2-3)

Could we change our attitude, we should not only see life differently, but life itself would come to be different. Life would undergo a change of appearance because we ourselves had undergone a change attitude. (Katherine Mansfield)

ABSTRACT

This final project is entitled “*Simple Input to Non Native Speaker in Effortless English Club by A.J. Hoge*”. The aims of this thesis are to analyze features of simple inputs and their reason of producing them in Effortless English Club by A.J Hoge.

The design to compose this research is qualitative descriptive that is intended to describe simple input in native speaker’s speech. The procedure of research will produce descriptive data in the form of written words or oral words about the object that is observed. The data were native speaker speech in Effortless English Club which were taken by downloading in video and audio form. Then, the data were analyzed using some steps, they are identifying every word in the utterances which are included in simple input, classifying features of the simple input, interpreting the data, and drawing conclusion.

The result of the analysis shows that there are five features of simple inputs used by A.J Hoge, they are 179 (22,5%) high frequency vocabulary, 61 (7,7%) Fewer contraction, 397 (49,9%), use of nouns rather than pronouns, 138 (17,3%) shorter sentences with simple grammar and 21 times (2,6%) repetition. Mostly, he used nouns rather than pronouns in giving simple input to learners because the teacher talk should be explicitly focused on understanding, using more pronouns might make the learner think more rather than when he/she listen the nouns in order to get meaning and some purposes. Beside that he also used more yes/no question rather than use question tag. A.J Hoge’s speech focuses on himself and the data in the monologue form.

A.J Hoge used features of simple inputs in order to make the words go deep into learners’ brain, relax and focus understanding. The most important thing is speed. The learners are expected to answer quickly and respond to speech which is made by him.
