doors), family room, a modern kitchen, **five**

NOUN PHRASE

**large bedrooms** featuring ensuite and walk-in

robe to main plus built-in robes in all others,

intercom/radio throughout and beautiful

ADJECTIVE

landscaped grounds with any oval-shaped in-ground pool.

## TAJ MAHAL

Taj Mahal is regarded as one of the eight wonders of the world. It was built by a Muslim Emperor Shah Jahan in the memory of his dear wife at Agra.

Taj Mahal is a mausoleum that houses the grave of queen Mumtaz Mahal. The mausoleum is a part of a vast complex comprising of a main gateway, an elaborate garden, a mosque (to the left), a guest house (to the right), and several other palatial buildings. The Taj is at the farthest end of this complex, with the river Jamuna behind it.

The Taj stands on a raised, square platform (186 x 186 feet) with its four corners truncated, forming an unequal octagon. The architectural design uses the interlocking arabesque concept, in which each element stands on its own and perfectly integrates with the main structure. It uses the principles of self-replicating geometry and a symmetry of architectural elements.

Its central dome is fifty-eight feet in diameter and rises to a height of 213 feet. It is flanked by four subsidiary domed chambers. The four graceful, slender minarets are 162.5 feet each. The central domed chamber and four adjoining chambers include many walls and panels of Islamic decoration.

Taj Mahal is built entirely of white marble. Its stunning architectural beauty is beyond adequate description, particularly at dawn and sunset. The Taj seems to glow in the light of the full moon. On a foggy morning, the visitors experience the Taj as if suspended when viewed from across the Jamuna river.

## Jakarta

Jakarta is located on the northwest coast of Java Island, at the mouth of the Ciliwung river. It dominates

Indonesian's administrative, economy, cultural activities, and is a major commercial and transportation hub within Asia.

The climate is hot and humid. Rainfall occurs throughout the year. The heaviest rainfall is from November to May. The city lies on a flat, low plain and is rainfall.

The citizen of Jakarta is almost 1 million. The growth of people in Jakarta is very fast.
