DEVICE of INFORMATION SYSTEM of INVOICE of PATIENT EXPENSE TAKE
CARE OF TO LODGE TO BASE ON COMPUTER [IN] RSUD TUGUREJO
SEMARANG

Xv + 140 pages + 13 tables + 36 pictures + 3 enclosures.

The Hospital's Information System have the benefit for the sake of hospital activity, one of them is to increase quality of sis service. Information system for the service of among other things in cashier shares take care of the lodging that is information system of invoice of patient expense take care of to lodge. Research target is to know the device of information system of invoice of patient expense take care of to lodge being based on computer in RSUD Tugurejo Semarang.

Research Type qualitative, research by observasional with the approach of cross sectional. Obyek of Research is Information System of expense invoice take care of to lodge, the subyek of research is all party got mixed up with a system. Appliance used by a guidance interview and observation guidance. Data obtained to be processed by content analysis and descriptive.

Result of research obtained, information system of expense Invoice take care of to lodge in this time is an network depict the path from system, relate to the other; dissimilar function at hospital. Information yielded by a system is not only required by finance management but also required by a related/relevant other; dissimilar management. Process the information executed by Worker TPPRI, treatment, medical service, medical supporter and cashier. Observation database from form, note and report. Related/Relevant fungsions that are cashier, supervisor cashier, head of finance and director. Then made device of information system of expense invoice take care of to lodge to base on the computer.

Suggested a system device proposed can be exploited, improvement and development of quality of human resource and also health service of hospital [through/ passing education and training, computer program of device accomodated with a computer program in hospital.

**RANCANGAN SISTEM INFORMASI TAGIHAN BIAYA PASIEN RAWAT INAP
BERBASIS KOMPUTER DI RSUD TUGUREJO SEMARANG**

Xv + 140 halaman + 13 tabel + 36 gambar + 3 lampiran

Sistem informasi rumah sakit mempunyai manfaat untuk kepentingan kegiatan rumah sakit, salah satunya untuk meningkatkan mutu pelayanan medik. Sistem informasi untuk pelayanan diantaranya di bagian kasir rawat inap yaitu sistem informasi tagihan biaya pasien rawat inap. Tujuan penelitian untuk mengetahui rancangan sistem informasi tagihan biaya pasien rawat inap yang berbasis komputer di RSUD Tugurejo Semarang.

Jenis penelitian kualitatif, penelitian secara *observasional* dengan pendekatan *cross sectional*. Obyek penelitian Sistem Informasi tagihan biaya rawat inap, subyek penelitian semua pihak terlibat dalam sistem. Alat yang digunakan pedoman wawancara dan pedoman observasi. Data yang diperoleh diolah secara *content analysis* dan deskriptif.

Hasil penelitian diperoleh, sistem informasi tagihan biaya rawat inap saat ini adalah suatu rangkaian menggambarkan alur dari sistem, berhubungan dengan fungsi lain di rumah sakit. Informasi yang dihasilkan sistem tidak hanya dibutuhkan pihak manajemen keuangan tetapi juga dibutuhkan manajemen lain yang terkait. Proses informasi dilaksanakan oleh Petugas TPPRI, keperawatan, pelayanan medis, penunjang medis dan kasir. Database diobservasi dari formulir, catatan dan laporan. Fungsi-fungsi terkait yaitu kasir, supervisor kasir, kepala keuangan dan direktur. Kemudian dibuat rancangan sistem informasi tagihan biaya rawat inap berbasis komputer.

Disarankan rancangan sistem yang diusulkan dapat dimanfaatkan, peningkatan dan pengembangan kualitas sumber daya manusia serta pelayanan kesehatan rumah sakit melalui pendidikan dan pelatihan, program komputer rancangan disesuaikan program komputer yang sudah ada di rumah sakit.
